EDUCATION

August 2023 - Present
Tanjore, India

SASTRA Deemed University

Bachelor of Technology, Computer Science & Engineering
CGPA 9.6/10

EXPERIENCE

June 2025

Sri Sathya Sai Seva
Organisations (India)

Software Engineer Intern

Built a Google Firebase powered Web app to view, analyze registrations and judge participants for 45 different events of DLBTS-2025 (District Level Balvikas Talent Search - 2025) event that had over 200+ participants. Event was physically hosted at Chennai, India and over 50 people concurrently used the app in real time. Hosted the site with Vercel.

September 2024 - Present

Association of Computing
Engineers (ACE)

Member of App Development Cluster

As an App Developer in the Association of Computing Engineers (ACE), I collaborated with a talented team to design and implement intent-based workflows and perform web scraping for API development. This experience strengthened my skills in modern app technologies, collaborative development, and building impactful digital solutions.

PROJECTS

DLBTS - 2025 | NextJS, TailwindCSS, Firebase Authentication, Firestore, Vercel Hosting June 2025

A Google Firebase - powered web app for managing registration, analysis and judging of participants across 45 events for DLBTS - 2025 conducted by Sri Sathya Sai Seva Organisations (India), Kancheepuram South District, Tamil Nadu.

- Designed role-based dashboards for Admins, ECs, and Judges.
- Admins/ECs: manage registrations, filter by group/event/district, view leaderboards.
- Judges: grade participants (individual & group) with real-time updates.
- Added alerts for judges if participants were engaged in two events.
- Developed attendance system for on-site registration desk.
- Implemented dynamic event configuration for marking criteria updates.
- Automated leaderboard generation for individual & group events.
- Secured with Firebase Authentication and real-time Firestore database.

Dream Creations | NextJS, TailwindCSS, Firebase Authentication, Firestore, Vercel Hosting Dec 2025

Developed a full-stack e-commerce web application for a real client using Next.js and Google Firebase. Implemented public product browsing, secure user authentication, cart management, order processing, and Firestore security rules for role-based accessing with responsive design.

- Developed a client-facing e-commerce platform using Next.js and Firebase.
- Designed public and authenticated routes using Next.js App Router.
- Implemented Firebase Authentication for secure login.
- Built cart and order management using Firestore.
- Configured Firestore security rules for private and public access.
- Admin dashboard for product, order management and payment tracking.
- Deployed the application and supported real user interaction.
